EMERGENCY ACTION PLAN

Bazley Property Dam ID: 2261

Owner:		
	Date: December 2023	
Address:		
	Version: 1	

Approved by the delegate of the Chief Executive, Department of Regional Development, Manufacturing and Water until 1 April 2028.

QUICK REFERENCE GUIDE Emergency Condition Level						
Dam Hazard	Alert	Lean Forward	Stand Up	Stand Down		
Flood Event Go to Section 4.2	Storage rising due to rain in catchment	Storage above FSL, unlikely to impact PAR	Storage above DCL, likely to impact PAR	Storage level falling or stabi- lised to FSL		
Contact		PARLDMG	 PAR LDMG Local Police/DDMG DSR 	Inform all previously notified contacts of stand down		
Sunny Day Failure Go to Section 4.3	Earthquake felt in the area, AND Intensity less than 5MM Significant new or increased seepage areas identified at the Dam or. Seepage flow containing sedi- ment (cloudy appearance) ob- served at the Dam or. New structural damage or movement areas identified at the Dam	Earthquake felt in the area, AND Intensity more than 5MM Seepage is increasing or earth material evident in the seepage is increasing and. The increase cannot be con- trolled or. New structural damage or movement areas have not sta- bilised and are demonstrating indication of continued worsen- ing	Dam failure is considered pos- sible via an identified failure mechanism or. New structural damage or movement areas indicate some potential for structural failure of the Dam	Seepage through the Dam is controlled and. No indicators of potential Dam failure are present and. Dam embankment is stable and. No potential indicators of po- tential Dam failure are present		
Contact	LDMGLocal Police/DDMGDSR	As per previous activation level, AND:PAR	As per previous activation level	Inform all previously notified contacts of stand down		

• General dam information can be found in section 5

• Contact information can be found in section 7

Dam owner	Responsible person	Signature	Date
Bowen Farm Holdings Pty Ltd		Details provided during meeting on 20/11/2023	20/11/2023

Controlled document distribution list

Document revision history

Revision number of approved EAP	Date	Summary of changes
		Initial EAP

2 PURPOSE

The purpose of this EAP is to:

- minimise the risk of harm to persons or property if a dam hazard event or emergency event for the dam happens
- identify dam hazards that could occur at the dam and the area likely to be affected for each hazard
- prescribe emergency actions taken by the dam owners and operating personnel in identifying and responding to dam hazards and notifying relevant entities.

It is possible for more than one dam hazard to occur at this dam at the one time. In such a circumstance, it may be necessary to act on the procedures within separate sections simultaneously.

The focus of this EAP is the management of dam hazards at this dam by the dam owner and the communication and notification of dam hazards to the Local Disaster Management Group (LDMG) and those persons at risk (PAR) downstream. The EAP sits within the broader local council emergency response framework and has been developed to be consistent with the relevant Local Disaster Management Plan.

3 SCOPE

This EAP covers:

- dam hazards
- details about the dam that are relevant to a dam hazard
- identification of circumstances that indicates an increase in the likelihood of a dam hazard event or emergency event
- triggers for activation of a tiered response to a dam hazard event or emergency event
- roles and responsibilities in responding to a dam hazard event or emergency event
- notification, warning, and communication protocols
- inspection, monitoring, and reporting protocols during emergencies
- the area likely to be impacted by a dam hazard

Role	Responsibilities
Dam Owner	Dam safety is the responsibility of the dam owner.
	 Develop and maintain an emergency action plan (EAP).
	• Respond in accordance with the approved EAP in all dam related emergencies.
	• Ensure the EAP is kept current and up to date, particularly contact details, and seek approval for changes. The EAP must be reviewed by 1 October each year.
	Distribution of current approved EAP to all parties listed in the distribution list.
	• Communicate effectively to all relevant entities listed in the notification list in the event of a dam hazard event or emergency event. Activate the EAP and keep a record of communication (Communication Log at Appendix C).
	• Maintain an incident log when an emergency condition is identified at the dam.
	Consider periodic testing of the EAP.
	• Prepare an Emergency Event Report (EER) and submit to the dam safety regula- tor within 30 business days after the end of the emergency event.
	• The dam owner is responsible for conducting regular inspections of the dam to identify any deficiencies (<u>Small dam safety pocketbook</u>). Where deficiencies exist, the dam owner is required to take appropriate steps to address these with a suitably experienced registered professional engineer of Queensland (RPEQ)

4 ROLES AND RESPONSIBILITIES

Role	Responsibilities
	 Make appropriate dam safety related decisions based on advice from an RPEQ where appropriate. The dam owner is also responsible for authorising immediate expenditure so that urgent repair work will not be delayed.
LDMG	 Notify and communicate with other emergency agencies (i.e., QFES, QPS, SES). Assess the severity of possible flooding and determine necessary actions based on information provided by the dam owner, as well as other available information such as localised flooding. Provide Police/DDMG status reports on situation.
Police/ DDMG	• Provide support to LDMG where capacity and capability to respond is reached.

5 GENERAL DAM INFORMATION

Table 1 Summary of locality information for Bazley Property Dam.

Description	Specification
Dam ID	
Lot/plan	
Address	
Catchment name and de- scription	

Table 2 Summary of technical information for Bazley Property Dam.

Description	Specification
Type of embankment	Earthfill - Compacted soil
FSL (m AHD)	25
DCL (m AHD)	25.9
Storage capacity at FSL (ML)	2760
Embankment max height (m)	8.7
Embankment length (m)	2500
Embankment crest width (m)	11
Catchment area (Ha)	TBC
Number of spillways	1
Type of spillways	by wash
Spillway crest level(s) (m AHD)	Not applicable
Outlet description	2 x controlled outlet structures approximately 2.3m high, 1m wide with an inlet pipe about 900mm diameter

6 DAM HAZARDS

Emergency actions

A dam emergency event is an event which has arisen from a dam failure hazard. The events that will initiate emergency conditions at the dam may include floods and seepage etc.

The following events are defined as emergency events that apply to this dam:

Dam flooding

Significant rainfall in the dam catchment with the storage level rising rapidly and overtopping expected. This has the potential to overtop and fail the embankment.

Follow table 3 during flood events.

Seepage events

Detection of new seepage or an increase in previously observed seepage, not due to inflow or a storage level rise. Even if no seepage can be seen, the presence of sinkholes and slumps could indicate internal erosion of the dam.

Follow table 4 during seepage events.

• Structural issues

Signs of distress or abnormalities in the embankment such as cracking, deformation or scouring of the embankment. This could also include structural damage identified following an earthquake event.

Follow table 4 during structural issues.

EAP activation

This EAP will be activated when an emergency condition (activation level) is triggered at the dam.

Hazard – Flood Events

Table 3 Flood event hazard

Activation level		Alert	Lean Forward	Stand Up	Stand Down
Activation trigger	•	Storage rising due to rain in catchment	 Storage above FSL, unlikely to impact PAR 	Storage above DCL, likely to impact PAR	 Storage level falling or stabilised to FSL (if no structural damage occurred)
Actions	•		 As per previous activation level, AND Undertake inspection every 12 hours 	 As per previous activation level, AND Continuously monitor water levels in the dam (if safe to do so) Support/supervise emergency works as re- quired, such as storage lowering or controlled breaching Discuss with LDMG, closure of affected roads if not already closed by others Maintain surveillance of area immediately downstream of dam (if safe to do so) 	 Prepare Emergency Event Report (EER) if required Inspect dam and contact RPEQ if new damage observed, or the dam was overtopped Return to routine activities
Internal notifications	•	Advise onsite personnel if re- quired	As per previous activation level	As per previous activation level	 Inform all previously notified contacts of stand down
External notifications			1. PAR 2. LDMG	 PAR LDMG Police/DDMG DSR 	 Inform all previously notified contacts of stand down
External message			 EAP has been activated to Lean Forward Describe current situation with dam: What is the event? (Flood event) What is the status of the dam? (overtopping has started?) 	 EAP has been activated to Stand Up Describe current situation with dam: What is the event? (Flood event) What is the status of the dam? (any structural damage to dam?) What is the current storage? (dam overtopping flows increasing) Is more rain coming? (continuing raining forecast) Confirm evacuations are required/underway/complete 	 EAP has been deactivated Describe current situation with dam: What is the status of the dam? Advise of current storage level (dam at FSL, overtopping flows decreasing) Advise weather conditions (no further rain forecasted)

Dam hazard – Sunny Day Failure Table 4 Sunny Day Failure Dam Hazard

Activation level	Alert	Lean Forward	Stand Up	Stand Down
Activation trigger	 New embankment cracking or settlement observed, visual movement/slippage of the em- bankment OR 	 Embankment abnormalities, dam wall movement, new or increased seepage with cloudy discharge, sinkholes observed on dam em- bankment or reservoir and/or cracks in the embankment/spill- way with seepage OR 	 Embankment abnormalities, dam wall move- ment, seepage/piping developing, and dam failure is likely, rapidly expanding sinkhole(s) and/or sudden or rapidly proceeding slides of the embankment slopes 	 Seepage/piping is manageable and/or water levels reduced to a 'safe' level
Actions	 Record all communication Monitor dam (if safe to do so) Monitor and record any leakage and/or cracks Liaise with RPEQ if required 	 As per previous activation level, AND Undertake inspection every hour (if safe to do so) Consider lowering storage (if safe to do so) 	 As per previous activation level, AND Continuously monitor the dam (if safe to do so) Support/supervise remedial works as required Lower the storage if directed Close any affected roads if not already closed by others Maintain surveillance of area immediately downstream of dam 	 Prepare Emergency Event Report (EER) if required Inspect dam and contact RPEQ if new damage observed Return to routine activities
Internal notifications	Advise onsite personnel if re- quired	As per previous activation level	As per previous activation level	 Inform all previously notified contacts of stand down
External notifications	 LDMG Police/DDMG DSR 	 As per previous activation level, AND: PAR 	As per previous activation level	Inform all previously notified contacts of stand down
External Message	 Advise EAP has been Activated Describe current situation with dam: What is the event? (Dam Safety risk) What is the status? (. identified embankment movement/cracks/leakage) Advise of current storage level (dam at FSL) 	 Advise EAP is at Lean Forward Describe current situation with dam: What is the event? (Dam Safety risk) What is the status? (. observations of identified embankment movement/cracks/leakage) Advise of current storage level (dam at FSL) 	 Advise EAP is at Stand Up Describe current situation with dam: What is the event? (Dam Safety risk) What is the status? (observations of identified embankment movement/cracks/leak- age) Advise of current storage level (dam at FSL) Confirm evacuations are required/under- way/complete 	 Advise EAP has been deactivated Describe current situation with dam: What is the event? (Dam Safety risk) What is the status? (dam embankment is stable) Advise of current storage level (dam at FSL)
